This position is available in Madrid .

About The Job

At Software AG Spain we are looking for ambitious computer technicians (with or without industry experience) willing to work and develop their professional careers in a leading global IT Company.

Once you have joined us, you will start a dedicated training period containing courses and practices, focused on Software AG technologies. After this, you will become part of our "International IT Projects Team", seated in Tres Cantos (Madrid). Your mission will be to travel around Europe or worldwide in order to provide qualified support on our international projects.

About You

Previous experience with integration software and/or BPM or "mission-critical" environments based on Natural/Adabas will be a distinct advantage.

Mandatory

Training – Bachelor Degree in technical studies, preferably computer science, mathematics, engineering, etc. or Professional Degree in computing.

Knowledge of Java programming and/or other object-oriented languages.

Fluent English spoken and written is essential (minimum C1 level, Certificate in Advance English or similar). Spanish not essential.

Availability to travel and work abroad, usually for long periods of time (usually from 2 to 3 months)

Preferable

Knowledge of other languages
These roles wil suit ambitious individuals with a high aptitude for learning new technologies quickly. You will also welcome the exciting travel opportunities as the project based nature of this venture will require you to be on-site throughout Europe and worldwide.

What Can You Expect

From day one you will be part of our Global Consulting Services regional unit for Europe, Africa and Latin America.
- Becoming part of an exciting new team interested in expanding your technology skills.
- Develop your commercial and technical exposure in a wide variety of projects.
- Be part one of the world's leading true digital organisations
- Defined professional career path within Software AG.
