
English Language Transformation Services

Our education services cover strategic planning, implementation and evaluation.

We work with ministries of education and education institutions worldwide to support development of high-quality language education.

We develop long-term partnerships to understand their strategic challenges and address these through transformational services for language teaching and learning that deliver lasting reform.

Strategy

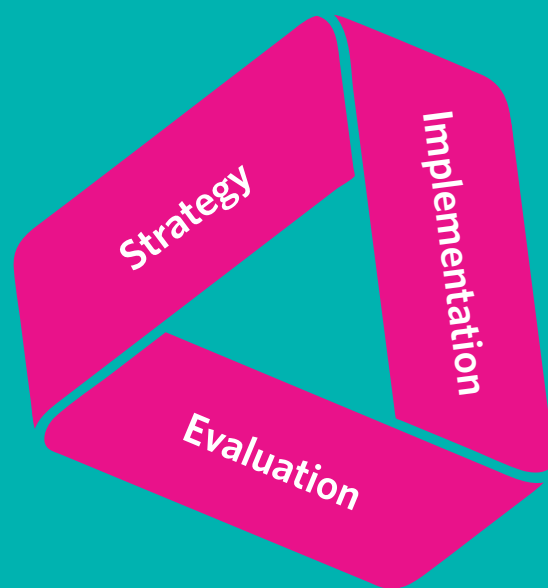

- Defining the 'Transformation' strategy
- Goal setting & identifying success indicators
- Alignment to international standards
- Curriculum design
- Technical advice on digital learning

Implementation

- Institutional capacity building
- Teacher training & development
- Learning & support materials

Evaluation

- Curriculum evaluation
- Benchmarking assessment
- Evaluation of digital capabilities
- Assessments & international certification
- Monitoring & impact measurement
- Impact research

Our packages can be tailored to meet your needs. You can choose a single solution, or combine them as required. For more information visit

Strategy

Defining the 'Transformation' strategy

Using our technical expertise we provide an evidence-based strategy to transform your English language education and enhance teaching, learning and assessment.

Goal setting & identifying success indicators

We can help you to establish a baseline of language levels of students and teachers, enabling you to identify gaps in the system and establish language learning goals and success indicators.

Alignment to international standards

We support alignment of curriculum and assessment tools to international standards.

Curriculum design

We can develop a tailored curriculum package aligned to your needs and educational context. This can include a curriculum framework, syllabus, scheme of work, list of resources and training.

Technical advice on digital learning

Following analysis of your local needs, we provide advice on how the relevant digital tools can be used for developing English language education.

Implementation

Institutional capacity building

We work with you to develop capacity around language teaching, learning and assessment by transferring our knowledge and skills to the local context.

Teacher training & development

We support the professional development of teachers worldwide, helping to improve standards of teaching by enhancing teachers' language and ICT skills, mobile-based pedagogy, practical teaching skills and assessment literacy. We work with you to design and deliver teacher development programmes using our internationally respected teaching qualifications and courses.

Learning & support materials

In collaboration with Cambridge University Press we develop print and digital textbooks and materials designed to meet your needs and enable learners to achieve academic success.

Evaluation

Curriculum evaluation

We provide an evaluation of your curriculum, syllabus and schemes of work and suggest ways to improve coherence, quality and expected educational outcomes.

Benchmarking assessment

We provide a benchmarking assessment service to assess and monitor language levels of your students and teachers.

Evaluation of digital capabilities

Using our Digital Framework for Teachers we can understand your needs and work with you to improve digital learning, including digital classroom tools and integrated mobile technologies.

Assessments & international certification

We can offer our internationally recognised Cambridge English certifications or tailored assessment to support effective learning.

Monitoring & impact measurement

We design tailored monitoring and evaluation systems to assure the quality of your English language education programmes and deliverables.

Impact research

We undertake impact research to investigate whether initiatives have led to change in learning, teaching and assessment processes and procedures.

Cambridge English Language Assessment is part of the University of Cambridge. We develop and produce the most valuable range of qualifications for learners and teachers of English in the world. Over 5 million people in 130 countries take our exams every year. Around the world over 20,000 universities, employers, government ministries and other organisations rely on our exams and qualifications as proof of English language ability. Cambridge English exams are backed by the work of the largest dedicated research team of any English language test provider.

Cambridge English Language Assessment – a not-for-profit organisation.

Find real-world examples of how Cambridge English approaches the task of transforming language education in partnership with ministries of education, education institutions and employers in our case studies booklet.
