

## Gujarat Scope English Project

**Client:** State Government of Gujarat

**Country:** India

**Cambridge English Language Assessment developed a custom-made programme of language assessment for the State Government of Gujarat, India as part of a programme aimed at providing its workforce with English skills for the international marketplace.**

As part of the BRIC group of countries (Brazil, Russia, India and China), India has continued to experience economic growth, with its skilled workforce making it popular with foreign investors.

It therefore became vital for Indian companies to have the right language skills to compete for international business. However, while students and professionals in India have good technical skills, many lacked the relevant level of English language and struggled in the job market.

The state government in Gujarat responded to this challenge with an initiative to raise the level of English among students and the workforce.

They created the Society for the Creation of Opportunities through Proficiency in English (SCOPE) to manage the project and appointed us to fulfil the assessment requirements.

Learning centres were set up across the state to provide specially developed English courses. We produced the Gujarat English Language Test to assess ability at pre-A1 level to Level A2 of the Common European Framework of Reference for Languages (CEFR). More able candidates are offered *BULATS (Business Language Testing Service)* which assesses up to Level C2. Linking the SCOPE programme tests to the CEFR allowed learners to approach employers with a language qualification linked to an internationally recognised standard for describing language ability.

Tests are subsidised by the government and are available to all members of the public. To ensure value for money, we localised many of the operational processes,

reducing running costs and enabling savings to be passed on to learners.

Since its launch in 2007, approximately 250,000 students benefited from the Gujarat English Language Test with SCOPE. Results were encouraging, with almost 50% of candidates reaching the highest level, A2. Many students continue to take *BULATS* and a research study is underway to assess the impact of Cambridge English assessments.
