Developing listening skills for Cambridge English Qualifications: A guide for teachers

Cambridge C1 Advanced
Who this guide is for

Just like official examiners, teachers also spend many hours evaluating learners’ language skills. This guide is for you. With lots of practical tips and real examples, it will help you to develop your learners’ listening skills in preparation for the Cambridge English C1 Advanced qualification.

About C1 Advanced

✔ One of the official Cambridge English Qualifications
✔ Tests reading, writing, speaking and listening skills, plus use of English
✔ Shows that learners have reached a very advanced level of English required in demanding academic and professional settings
✔ Comes after B2 First or B2 First for Schools and before C2 Proficiency
✔ Tests learners at CEFR Level C1
✔ Can be taken on paper or on a computer

You can find out more about our C1 Advanced qualification and other exams on our website. See cambridgeenglish.org/schools.
How to use this guide

To get the most from this guide:

• Try the practical ideas and reflect on how these techniques affect the processes of learning and teaching in your classroom.

• Open the attached Resources pdf and download the example exam tasks and resources in the guide.

• Discuss different approaches with learners in order to understand their preferences and needs, and to find out what approaches are most helpful to them.

• Reflect on your own listening skills, both in your first language and in any other languages that you speak. What do you find challenging? How do you overcome these challenges? Can you share any top tips with the learners in your own classroom?

• You can navigate the document by using the hyperlinks in the text and the buttons on each spread:

Previous page      Next page      First page      Previous view

There are also some other terms in this guide which are more widely used in the field of assessment. When these terms appear in this guide, you’ll find an explanation nearby in a glossary box like this:

Key terminology

The Common European Framework of Reference (CEFR) is an international standard for describing language ability. It uses a six-point scale, from A1 for beginners up to C2 for those who have mastered a language. This makes it easy for anyone involved in language teaching and testing, such as teachers or learners, to see the level of different qualifications.
Key terminology

The study of listening is a specialist field and, like all specialist fields, there is some common terminology which might be unfamiliar or confusing. Learning to recognise these terms will help you to understand this guide, which will help you to develop your learners’ listening skills.

What does effective listening involve?

When we achieve a very good level of listening in a particular language, we often forget how sophisticated this skill really is! The terms we use to describe the processes of listening are called sub-skills and they include:

<table>
<thead>
<tr>
<th>Sub-skill</th>
<th>Definition</th>
<th>Example from everyday life</th>
<th>Which parts of the exam test this sub-skill?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Predicting</td>
<td>Thinking about what you are going to hear, based on what you know about the speaker, the topic and the context.</td>
<td>Your friend sends you a video from social media of an interview with an actor you both like. You immediately think about other interviews you’ve seen with this actor, what you already know about his latest film and what he might say about it in this interview.</td>
<td>Parts 1, 2, 3 and 4</td>
</tr>
<tr>
<td>Listening for gist</td>
<td>Understanding just the general topic of what you hear.</td>
<td>You are sitting in a park and you overhear friends talking. One of them is talking about a recent family event. It’s not important that you notice or remember all the details or words, but it sounded like it was a very happy event.</td>
<td>Parts 1, 3 and 4</td>
</tr>
<tr>
<td>Listening for key information</td>
<td>Identifying specific words or phrases in what you hear.</td>
<td>You are waiting at the train station, listening to the announcement with information about which platform to go to. You listen carefully because you don’t want to go to the wrong platform and miss your train.</td>
<td>Part 2</td>
</tr>
<tr>
<td>Listening for detailed understanding</td>
<td>Understanding the content of what you hear in depth, especially the opinions and attitudes of the speaker(s).</td>
<td>You want to take a friend to the cinema as a surprise for his birthday. You ask his sister which films she would recommend, since you like similar things and she will know if he’s already seen them. You listen carefully to her explanation because you want to know what she thought of each film before you make a choice.</td>
<td>Parts 1, 3 and 4</td>
</tr>
</tbody>
</table>

Expert listeners can bring these four sub-skills together when they listen, so they can recognise what they hear and understand the meaning.

For example, imagine we are listening to someone describing a recent experience and we recognise the word Unbelievable! Our ability to match the sounds to the word is called bottom-up processing. But the word unbelievable doesn’t tell us much about the person’s recent experience. Why were they so shocked? How did they feel? Angry? Amused? Disappointed? To understand what the speaker means when they use this word, we need to listen for more information, we need to know the context and co-text. This is called top-down processing.

<table>
<thead>
<tr>
<th>Process</th>
<th>Definition</th>
<th>Example from everyday life</th>
<th>Parts of the exam test this sub-skill?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bottom-up processing</td>
<td>Recognising small units (sounds), building them up into bigger units (words) and then bigger ones (phrases). Sometimes called ‘decoding’.</td>
<td>You ask someone for an address and they tell you it’s number 60. You accurately identify the sounds and stress of the word sixty and don’t mishear it as sixteen.</td>
<td>1, 2, 3 and 4</td>
</tr>
<tr>
<td>Top-down processing</td>
<td>Using context (knowledge of the world) and co-text (what the speaker has said so far) to help you understand words that are not clear.</td>
<td>You’re watching a fashion programme on TV. You think you hear someone talking about <em>string, summer, autumn and winter</em>. You doubt that you heard the first word correctly – you’re not sure if <em>string</em> is a word in English, but you know that <em>spring</em> is a word. And you know that it makes sense when talking about other seasons. You also know that in the world of fashion, clothing is often categorised by season. You use this knowledge to make an educated guess: the person probably said <em>spring</em>, not <em>string</em>.</td>
<td>1, 2, 3 and 4</td>
</tr>
</tbody>
</table>
Listening strategies learners can use to help them understand

Expert listeners can automatically understand and interpret what someone is saying, but this can be very difficult for the learner, especially when their language level is low or if the context is unfamiliar. This means communication can break down so the learner might need to use different listening strategies to help them understand. For example:

Diego hears the key words past, library, next and 5 minutes when he asks someone for directions. He uses his knowledge of the world and guesses that the speaker is telling him to continue walking for about 5 minutes and keep going when he passes the local library.

Mahtab knows about sports but only catches the words team, lose, 10 and players. She uses her knowledge of the topic to help her understand that the speaker is describing a football team who lost their match because they only had 10 players instead of 11.

Yinxuan isn’t sure if the speaker said a lot of fun or a lot of sun. He waits until the speaker has said a little bit more so he can check his ideas, and one of these options suddenly makes more sense.

Jana hears a new word when her friend is talking: I don’t really like ???. She can guess the meaning from the co-text because her friend has been talking about healthy food.

Listening strategies like these help when the learner has difficulty understanding by working with what they were able to understand. Over time, the learner will become a more effective listener.

The challenges of listening in a second language

Listening can be difficult, even in our first language. It can be difficult to understand if someone is speaking quickly, or if they are using words we don’t know, on an unfamiliar topic. Physical and environmental factors also make a difference: if we have hearing problems, if we can’t see the speaker’s face, if several people are speaking at the same time, or if there is a lot of background noise – all these things make it harder to understand what you hear. Listening in a different language can be even more difficult.

Challenges for the learner

In addition to the general challenges of listening, there are other factors which can affect learners’ listening in a second language. Here are some of the challenges your learners are likely to face:

1. Language level. Do your learners have a wide knowledge of vocabulary, grammar or idioms?
2. Awareness of pronunciation. Can they recognise the words and structures they know when they hear them? Can they understand words and phrases in fast and fluent, connected speech?
3. Experience and exposure to the language. Are learners familiar with the speaker’s accent? Have they heard it before? How is it similar to or different from their own accent?
4. Knowledge of the topic. Are learners listening to somebody talking about a specialist subject? Are learners interested in developing their skills in the second language? How confident are they about listening? Are they aware of their own strengths and weaknesses?

Challenges for the teacher

Teachers also have several practical challenges to manage:

1. Time and space in the syllabus. How much time do you have to develop learners’ listening skills? How long is the course, and will the learners be able to see their progress over time? What are the learners’ expectations?
2. Access to resources. What materials do you have? Do you have audio recordings with accompanying exercises? Are these suitable for the learners’ level, the exam they’re preparing for, improving their particular weaknesses, etc.?
3. Giving feedback. How can you give feedback to individual learners in a large class? What’s the best way to give feedback? How can you make sure you’re developing learners’ ability to listen, and not just checking correct/incorrect answers?
4. Technology. What audio equipment do you have? Is the sound quality good enough for a large classroom? Are learners studying on their own devices? Are they using headphones? Are they studying online from home, perhaps with background noise, distractions or technology problems, which you can’t control?

These are not complete lists, of course. Many teachers will be very familiar with the challenges mentioned here and can probably add a few more from their own experience!

The rest of this guide is designed to help you and your learners overcome these challenges and improve their listening skills. There are several practical activities, illustrated with examples from the Cambridge English C1 Advanced exam.

🌟 Top tips for developing learners’ listening skills

The long-term goal of a learner is to become so comfortable with the different listening sub-skills in their second language that these become automatic, just like in their first language. This is a bigger challenge than just preparing for an exam, but the exam can provide structure and focus which will help both learners and their teachers. Developing listening skills is about helping learners to notice and practise all the small things which just preparing for an exam, but the exam can provide structure and focus which will help both learners and their teachers. Developing listening skills is about helping learners to notice and practise all the small things which effective listeners do, and to use strategies to help them while their general listening abilities are improving.

General advice

✔ Do … practise bottom-up decoding skills frequently. The best way to make these processes easier and more automatic is to practise little and often over a long time. You can do this by checking and drilling pronunciation every time you teach new words or grammar, or through techniques like dictation and focused listening.

✔ Do … raise learners' awareness of how top-down strategies can help them understand more. You can practice these through techniques like using context to guess the meaning of unclear words.

✘ Don't … focus only on meaning and language. It's also important to build learners' confidence in listening by praising their success and improving their self-awareness.

✔ Do … encourage learners to listen for pleasure. Listening doesn't always have to mean listening practice. It could mean learners sharing songs or podcasts that they enjoy, for example.

✔ Do … take a healthy approach to exam practice. It's important to practise exam tasks formally sometimes, but don't make exam practice the only listening work you do. Treat listening lessons as an opportunity to help learners understand their own strengths and weaknesses and how to use strategies to improve their understanding.

污染防治和科学技术的可持续发展

Before listening: preparing for the task

✔ Do … make sure learners understand what they have to do in the exam task and how to avoid silly mistakes. For example, teach them how to prepare for a specific question, to underline or highlight key words, to read multiple-choice options carefully and to be aware of distractors, which are designed to make them really listen and think. See Activity 1 for an example of how to analyse exam questions carefully.

✘ Don't … just press play with no time to prepare. It's important to spend some time on pre-listening tasks so that learners are ready to listen. All four activities include ideas on how to generate interest in the task and topic before listening.

✔ Do … check the technology works before class. It's also helpful to have equipment which allows you to rewind just a few seconds so you can easily find and re-play the same very short section several times in a row.

While listening: how to conduct listening tasks

✔ Do … stay quiet while learners listen. Make sure they aren’t distracted by your voice, by other learners or by background noise (if possible). After you press play, just let them listen and concentrate on the task.

✔ Do … wait a moment for learners to finish thinking and writing after you stop the recording. Don’t press stop and then immediately begin speaking – this will quickly make learners forget what they just heard and focus on what you’re saying instead.

✘ Don't … forget to check learners' predictions! When practising this sub-skill, it’s important that learners have the chance to compare their first ideas with what they hear the next time they listen. This will help reveal any problems learners have with understanding, and help to identify what they need to practise to improve. See Activities 1, 2 and 3 for examples of using pre-listening stages to make and check predictions.

✘ Don't … attempt a listening to check learners' pre-listening predictions. After the whole recording is finished, you can ask learners to compare and explain their predictions before you confirm if they were right.
Top tips for developing learners’ listening skills

After listening: how to check understanding

✔ Do … allow enough time for feedback, especially when deeper understanding is needed. It’s especially important for learners to understand why wrong answers are wrong, and sometimes discussion about just one answer can take several minutes or require several opportunities to listen again.

✘ Don’t … simply accept the first answer that somebody offers in class. Often the strongest learner will answer, which can mean the class moves at the pace of the most able learner.

✔ Do … take a range of answers from different learners before confirming which is correct. Ask several learners for their ideas, ask if they agree with each other, then play the recording again so they can listen and check their ideas. Finally, ask them if anyone wants to change their original answer before you confirm which is correct.

✘ Don’t … ask pupils to report how many answers they got right in the exercise. This doesn’t tell you what specifically they are finding difficult and it can be very demotivating. It can also be embarrassing for a learner who found a task much harder than their peers.

✔ Do … give learners the chance to compare their answers in pairs before you ask them what they wrote or chose. This can help learners who may not be very strong at listening, or if they are less confident. They won’t feel so shy about sharing their ideas with the rest of the class.

✔ Do … ask learners to justify their choices before you confirm which is correct. For example, ask what they heard that helped them to decide on the correct answer, or ask them to explain why one option is possible and another is impossible. See Activities 1 and 3 below, for an example of using feedback stages to explore learners’ answer choices.

✔ Do … experiment with tech tools like Kahoot! in order to get a whole-class view of the choices that learners made. This also avoids making learners who made an incorrect choice feel uncomfortable. An offline and tech-free alternative is for students to hold up a card or mini-whiteboard showing their answer while they close their eyes so they can’t see the other learners’ answers! Some learners find this adds an element of fun and mystery.

Preparing learners for the C1 Advanced Listening paper

The texts and tasks in Cambridge English Qualifications are designed to reflect real-world communication and to test learners’ true abilities in English, so preparing learners for the Listening paper for our qualification shouldn’t be very different from developing and assessing their listening skills in general. But of course, the tasks, assessment focus and timings for an exam are very specific and learners should have plenty of practice before they take the real exam.

To prepare for the C1 Advanced exam, learners will benefit from:

• plenty of practice, in class and at home, of listening to the kinds of formal and informal texts they will hear in the exam, including interviews and discussions of varying length, lectures, radio broadcasts, speeches and talks
• plenty of opportunities to hear different varieties and accents of English, different styles of speaking and speakers of different ages and backgrounds
• chances to practise exam tasks under timed conditions, just like in the real exam
• participating in regular classroom discussion activities in English
• making sure they can write clearly on the answer sheet so that examiners can read their answers easily.

They also need to understand:

• what they need to do in each task in the Listening paper
• the role of distractors in the exam and how these can lead to wrong answers
• their own strengths and weaknesses when listening
• how they can improve any areas of weakness
• what strategies they can use to overcome doubts or make intelligent guesses if they don’t understand certain words or phrases that they hear.

Top tip

After doing practice tasks, get learners to record their results and their feelings in a personal learning diary. They should say what they did well and what they found more difficult. Then they can refer back to these notes later in their course in order to see their improvement and consider anything that they still find challenging.
How the exam is assessed

The C1 Advanced Listening paper has four parts and lasts for about 40 minutes in total, plus 5 minutes for candidates to transfer their answers to the answer sheet (if they’re taking the paper-based test). Every audio recording in the exam is played twice.

<table>
<thead>
<tr>
<th>Task format</th>
<th>What the learner has to do</th>
<th>Which listening skills are being tested</th>
</tr>
</thead>
<tbody>
<tr>
<td>Part 1</td>
<td>6 questions, each with 3 multiple-choice options</td>
<td>Listen to three, short, unrelated recordings between interacting speakers. Choose the correct option for each question. Each dialogue has two questions.</td>
</tr>
<tr>
<td>Part 2</td>
<td>8 sentences, each with 1 gap to fill</td>
<td>Listen to a monologue (about 3 minutes) and complete the gaps in eight sentences with information from the recording.</td>
</tr>
<tr>
<td>Part 3</td>
<td>6 questions, each with 4 multiple-choice options</td>
<td>Listen to an interview or exchange between two or more speakers (about 4 minutes) and identify attitudes, opinions, feelings, speaker purpose, function or main ideas.</td>
</tr>
<tr>
<td>Part 4</td>
<td>2 tasks. Each task has 5 questions and 8 multiple-choice options</td>
<td>Listen to five, short, related monologues (about 30 seconds each) and choose the two correct options for each speaker.</td>
</tr>
</tbody>
</table>

Important note: The example exam tasks used in this guide are provided to give you and your learners an idea of the format of the exam and what is being tested in each part. The tasks have not been fully pretested and calibrated like our published exams. To assess your learners’ readiness for a live exam use one of the official sample tests on cambridgeenglish.org, or go to our Mock Test Toolkit for tips on using sample tests.

★ Top tip

Part 2 is the only part which requires learners to do more than choose an option from the multiple-choice list. In Part 2, they must complete a gap with something they heard in the recording. When practising Part 2, make sure learners check each question carefully by highlighting key words. They should think about the grammar and context to help them have an idea about the type of word to listen for. For example, here the gap must be filled by a noun because it is a university subject, and it could be one word or a short phrase.

At university (3) ……………………… was the first subject Daniel studied.
Activity 1: Task familiarisation

Check with learners what they know and can remember about the format of this part of the exam. You can either check with learners before you start Activity 1, or at a point in the lesson that you feel works best for your learners. Here are some helpful questions you can ask.

• How many recordings will you hear? (Three)
• How many multiple-choice questions are there for each recording? (Two)
• How many options are there for each question? (Three)
• What should you do before you listen? (Read the question carefully and think about the topic. Highlight any key words in the task and think about other words speakers might use to express the same ideas.)
• What should you do the first time you listen? (Listen for the general ideas expressed by the speakers and try to choose one option for each question.)
• What should you do the second time you listen? (Check the options you chose and make a final choice.)

Activity 1: Listening Part 1

Aims: To raise awareness of the format of this task; to practise listening for ideas rather than exact words. Also useful for: Listening Part 3, Speaking Part 4 and (optional follow-up) Writing Part 2.

Preparation and equipment: Open the resources with the example exam task and script. This activity focuses on just one question from a Listening Part 1 paper. However, you can repeat the steps for other questions from a complete exam task. Make copies of the task for learners. Read the highlighted audioscript and be prepared for when the correct or incorrect answers appear in the recording.

Steps: Prepare to listen

1. Put learners in pairs or small groups for a discussion on the topic of public transport. Give them some simple discussion prompts from the resources, similar to a Speaking Part 4 task:
   • How important is road safety in busy cities? Do you know of any local road safety campaigns? How effective are they?
   • Do you think it’s important to encourage people to use more environmentally friendly modes of transport, such as cycling or walking? Why?
   • How important is it for people to understand safety statistics when deciding how to travel around a city?
   • What are some of the advantages and disadvantages of using a bicycle in a city? Why?

Top tip

Brainstorm or give learners some useful phrases for sharing opinions in this task, such as:

• In my view/opinion …
• In my experience …
• If you ask me …
• I feel …
• I agree that … but …
• How about you?
• Would you agree?

If possible, include some expressions used in the recording the learners are about to hear. Encourage learners to make a record of useful phrases in their notebooks for later reference.

Activity 1: Listening Part 1

Listening 1

2. Tell learners that, as they have just discussed the topic of public transport and exchanged opinions, they’re now going to listen to two people talking. It’s a Part 1 recording where two people discuss a report on the subject of transport in their city.

3. Ask learners to listen and make a note of the speakers’ opinions and attitudes. Play the recording.

4. After listening, learners work in groups or pairs to compare the ideas expressed in the recording with their own ideas from their earlier discussion. How similar or different were they?

Adaptation

Listening once without the question or the multiple-choice options can help learners pay attention to what they hear, and not be too guided or distracted. First, encourage learners to discuss and think about the topic. Ask them to predict what they might hear, then let them listen to check their predictions. After they’ve tried to answer the questions this way, you can show them the question and the multiple-choice options and see if they find it easier to select the right one.

Exam strategy

Encourage learners to mark one answer to each question after the first listening in the actual exam, even if they’re not sure it is correct. They can then use the second listening to confirm or amend their answer.
Activity 1: Listening Part 1

Listening 2
5. Give learners a copy of the task. Point out that they have already done some pre-listening preparation and listened once for a general idea.

6. Ask learners to work in pairs or small groups. They should look at the task, and highlight key words in the question and the multiple-choice options.

7. Encourage learners to brainstorm any words and phrases they heard the first time they listened that express similar ideas to the parts they highlighted in the question. Take whole-class feedback before listening again.

8. Learners listen to the recording for the second time and check their choices.

9. After listening, encourage learners to compare their choices with their partners. If they disagree, they should explain and justify their decisions with each other.

10. Before confirming the answer, take a quick survey with the class to find out which option most learners think is correct. If there is significant disagreement, ask them to justify their choices with reference to what they heard in the recording.

11. Confirm the correct answer (C) and explore the reasons why the other options are not correct, before listening for a third time to check.

Exam strategy
Most Part 1 questions test more than the literal meaning of words from the recording. Encourage learners to read the questions carefully before listening and think about what they are being asked to listen for, such as the speaker’s purpose, attitudes or opinions, the gist of an argument, or perhaps whether or not the speakers agree about a certain point.

Activity 1: Listening Part 1

Listening 3
12. Refer learners to the annotated question and answer key. Key words in each of the multiple-choice options are highlighted in green. Key words to the correct answer in the question are highlighted in yellow.

Annotated question and answer key
You hear two people discussing a report on the subject of transport in their city.
The man feels that the report
✘ A is overly focused on issues of road safety.
✘ B presents statistical information in an accessible way.
✔ C doesn’t always develop its argument coherently enough.

13. Play the recording for the third time. Ask learners to listen and think about the key words in the multiple-choice options. Ask them to make a note of key words and phrases that would suggest that options A and B are incorrect, and why option C is the correct answer.

14. Learners might wish to listen with a copy of the audioscript.

15. Pairs compare the words and phrases they heard that indicated the correct answer. Take whole-class feedback.

16. Refer to the annotated audioscript with key words highlighted as well as the answer key with explanation, to show why options A and B are incorrect, and why option C is the correct answer.

Annotated audioscript with key words highlighted
Key words are highlighted in green. The key words to the correct answer in the question are highlighted in yellow.
Male: What did you think of the report about commuting patterns in the city?
Female: Well, I was a bit angry to be honest. I felt it was advocating the use of environmentally unfriendly modes of transport and it was rather condescending when it came to walking and cycling, quoting all those figures about accidents and stuff.
Male: I found it tough going, wading through all the statistics and graphs. I lost the thread a bit in the middle. I agree that cycling should’ve been promoted more – after all, it’s a much better use of road space. But I thought the safety issues the report flagged up were pertinent, especially about cyclists who don’t adhere to the rules of the road – you know, cycling on pavements and stuff.
Female: I must admit that I’ve resorted to that occasionally to dodge congestion. I’m not condoning it or anything, but motorists break the law all the time too.
# Activity 1: Listening Part 1

## Answer key with explanation

<table>
<thead>
<tr>
<th>The male speaker expressed that ...</th>
<th>Decision about multiple-choice options</th>
<th>Key words from the script</th>
</tr>
</thead>
<tbody>
<tr>
<td>The degree of focus on road safety was appropriate.</td>
<td>✘ Option A is a wrong answer. While the safety issues were relevant, the 'degree of focus' on road safety was less so and the report could have made more of cycling.</td>
<td>cycling should've been promoted more – after all it’s a much better use of road space. I thought the safety issues the report flagged up were pertinent, especially ...</td>
</tr>
<tr>
<td>The statistics were overwhelming.</td>
<td>✘ Option B is a wrong answer. There were so many statistics and graphs for the reader to work through (wade through) making the report difficult to read.</td>
<td>I found it tough going, wading through all the statistics and graphs.</td>
</tr>
<tr>
<td>The report was difficult to follow.</td>
<td>✔ Option C is the right answer. The speaker wasn’t able to follow the argument because the statistics and graphs (wade through) presented in the middle of the report made the argument difficult to follow, so it was not coherent enough.</td>
<td>I found it tough going, wading through all the statistics and graphs. I lost the thread a bit in the middle.</td>
</tr>
</tbody>
</table>

## Adaptation
For learners who need extra support, let them read the audioscript as they listen to the recording one final time. They can highlight or underline key words and phrases in the script to help them choose and explain which answers are correct.

## Optional follow-up
Set learners a report-writing task in the style of Writing Part 2, either for homework or as a collaborative writing task in class. Check the attached Writing Part 2 task linked to Activity 1. You could also use a similar activity from the teacher guide to assessing writing for C1 Advanced.

## Top tip
Remind your learners that they need to listen to the whole extract carefully before choosing their answers and not assume too soon that they have heard the correct answer. The two questions each have a different focus, so it’s possible that information relevant to the answers could come from different parts of the recording. This means learners may not be able to answer the questions in sequence as they would in a longer text.
Part 2: Task familiarisation

Remember to check what learners know and can remember about the format of this part of the exam when you are preparing in class. You can either check with learners before you start Activity 2, or at a point in the lesson that you feel works best for your learners. Here are some helpful questions you can ask.

- How many sentences are there? (Eight)
- How many gaps are there? (Eight)
- Do the answers appear in the recording in the same order as in the task? (Yes)
- In this part of the Listening paper, how many words can go in each gap? (Up to three, but usually just one or two)
- What kinds of words go in the gaps? (Usually things which give concrete information, often nouns or proper nouns)
- Should you change the words you hear to fill in the gaps? (No. This task doesn’t test learners’ ability to paraphrase – they should simply write the actual words they hear)
- Should you write your answers in UPPER CASE/CAPITALS or lower case? (Upper case)

Activity 2: Listening Part 2

Aims: To familiarise learners with the format of this task; to practise strategies for analysing the question before listening; to remind learners when not to paraphrase in the Listening paper of this exam.

Also useful for: Speaking Part 2, Writing Part 1 (see optional follow-up activity).

Preparation and equipment: Open the resources. Make copies of the example exam task for learners.

Prepare two sets of pictures for the pre-listening speaking task, featuring pictures of things that are mentioned in the recording.

Steps: Prepare to listen

1. Raise learners’ interest in the topic through discussion in pairs in the style of Speaking Part 2.

2. For the topic of ‘natural remedies’, it can be helpful to find two sets of pictures online that represent some of the things mentioned in the recording. Follow these steps with the examiner script with learners:

Search online for three pictures to show to learners of: painkiller tablets, some herbs being mixed by a herbalist, someone putting oil on an insect bite.

‘Student A, these pictures show different types of medical treatment. I’d like you to compare two of the pictures, and say why people might choose these medical treatments, and how popular you think they are in your country.’

Student A speaks for 1 minute.

‘Thank you. Student B, which of these treatments do you think is most effective, and why?’

Search online for three pictures to show to learners of: soup, hot chocolate and honey.

‘Student B, these pictures show three different foods that some people enjoy when they’re feeling ill. I’d like you to compare two of the pictures, and say why you think people choose to eat these things when they’re ill and how useful they are for fighting a common cold.’

Student B speaks for 1 minute.

‘Thank you. Student A, which of these foods would you prefer if you were ill and why?’

Listening 1

3. Tell learners they’re now going to listen to an expert talking about the same topic. This is a Listening Part 2 recording in which a scientist called Daniel Chan talks about his work on natural remedies.

4. Play the recording. Learners should listen and take brief notes to check if he mentions any of the ideas that came up in their discussion.

5. After listening, learners compare their ideas with a partner. Allow them time to respond to the speaker’s ideas – did he say anything they found especially interesting, for example? What did they find interesting and why?

Exam strategy

Make your learners aware of how much they themselves bring to a listening task. Encourage them to make predictions about listening texts from their own experience and world knowledge. The exam task rubric (instructions at the beginning) provides information about the speaker, topic and context. Encourage your learners to use this information to help them tune into the text quickly when they hear it.
Activity 2: Listening Part 2

6. Write the following words on the board.

- accountancy
- ginger
- migration
- grapefruit
- honey
- sticky mixtures
- painkillers
- sunhat

7. Tell the learners you’re going to do the Listening Part 2 task – but the ‘wrong way round’ because they have the answers to the questions on the board.

8. Give learners the Part 2 task supplied in the resources. Ask them to read the task and highlight key words.

9. They have to listen and decide which word or phrase from the board goes in which gap.

10. Play the recording. Learners will probably find this step fairly easy, since they just heard the recording and they now have the task itself to help them – but this should help to build their confidence.

**Top tip**

For learners who need more support, or who are doing this task for the first time, it can help to give them the words exactly as they should go in the gaps. This will allow them to focus on listening for the correct meaning and not to worry about the correct forms (singular, plural, etc.). Later, when they’re more confident, you can discuss the importance of writing the correct form exactly as learners hear it in the recording.

**Top tip**

Most questions in Part 2 will focus on concrete pieces of information (e.g. nouns, proper names, etc.). They will generally be single words or very short noun groups (e.g. adjective plus noun), and usually no more than three words are required.

**Adaptations**

1. **Word cloud** Instead of simply writing the words on the board in the order presented above, you could present them as a word cloud.

2. **Cut-out-and-move** You could also print or write them on pieces of paper. As learners listen they can move them into the correct order and then move them again later if they change their mind while listening.

See the attached printable word cloud and printable word cards for this activity in the resources.

Activity 2: Listening Part 2

11. Learners listen for the third time to check their answers and then compare with a partner.

12. Elicit the answers and write them on the board. If possible, project the task so you can complete the gaps together with the class. You can refer to the annotated audioscript with the answers highlighted supplied in the resources. A clean copy of the complete audioscript is also supplied.

13. For each answer, check with learners: would any other answer be possible without changing the word Daniel says? For example, based on the recording, the first gap could be completed with hat rather than sunhat. See the full answer key below. (Answer: yes, sometimes slight variations are acceptable. See the full answer key for examples of this for this sample task.)

14. Remind learners that in the exam they should write their answers in UPPER CASE, not lower case.

**Answer key**

<table>
<thead>
<tr>
<th>Question</th>
<th>Acceptable answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>(A) (SUN) HAT</td>
</tr>
<tr>
<td>2</td>
<td>(SOME) GINGER</td>
</tr>
<tr>
<td>3</td>
<td>ACCOUNTANCY / ACCOUNTING</td>
</tr>
<tr>
<td>4</td>
<td>(A / SOME / THE) (LOCAL) HONEY</td>
</tr>
<tr>
<td>5</td>
<td>PAIN(-) KILLERS / PAIN REMEDIES</td>
</tr>
<tr>
<td>6</td>
<td>MIGRATION (FROM THE COUNTRYSIDE) LEAVING THE COUNTRYSIDE</td>
</tr>
<tr>
<td>7</td>
<td>STICKY MIXTURE(S)</td>
</tr>
<tr>
<td>8</td>
<td>(SOME) GRAPE(-) FRUIT</td>
</tr>
</tbody>
</table>

**Exam strategy**

When learners think they’ve heard an answer, they should write it down carefully and check the grammar is accurate according to what appears before and after the gap. For example, if they don’t hear clearly whether a word is singular or plural, they should check the rest of the sentence to see which form is appropriate.

**Optional follow-up**

Set learners an essay task in the style of Writing Part 1, either for homework or as a collaborative writing task in class. Unlike in Listening Part 2, in this task, learners can (and should) paraphrase, using their own ideas and words instead of those in the recording. Check the attached Writing Part 1 task linked to Activity 2. You could also use a similar activity from the teacher’s guide to assessing writing for C1 Advanced.

**Top tip**

Tell learners that in the exam, they mustn’t change the words to fill the gaps. This type of activity raises their awareness of the permissible range of such variations, so they can feel confident when doing this task and focus appropriately on writing down accurate answers.
Activity 3: Listening Part 3

Aims: To practise listening to long texts for speakers’ attitudes and opinions; to practise different ways of reporting these attitudes and opinions.

Also useful for: Listening Part 1.

Preparation and equipment: Open the resources with the question stems, the example exam task with multiple-choice options and post-listening task. Make copies of these tasks for your learners. Read the audioscript and be prepared for when the correct or incorrect answers appear in the recording.

Steps: Prepare to listen

1. Raise learners’ interest in the topic of ‘green’ architecture and renewable energy. Ask them what they already know about these topics and what they’d like to learn more about. For example, they might wonder about the following:
   - What is involved in being a ‘green’ architect?
   - Is ‘green’ architecture the future, or just a trend?
   - What’s the difference between designing a ‘green’ building and any other building?

Adaptations

If you’re teaching online, you could set questions like these as a brief ‘web quest’. Learners spend a few minutes searching for information online linked to the topic of the recording, then work in groups to share what they found out.

Top tip

Part 3 is the longest part of the Listening paper. Plenty of regular exposure to longer interviews and discussions, such as radio programmes from media websites in English, will help your learners prepare. They should be exposed to varieties of English, to speakers of different ages and backgrounds, and to the language of different contexts, e.g. formal announcements, lectures, less formal talks, informal discussions, interviews, etc.

Exam strategy

In multiple-choice tasks, encourage learners to concentrate on the question stems, rather than the options in their preparation, so that they can listen for the answer in the text and then match this to the closest option.
Activity 3: Listening Part 3

Listening 3
11. Now give learners the questions with multiple-choice options supplied in the resources. They should work with their partners and select which option they think is correct for each question. If they’re not sure at this stage, that’s OK, but they should make a note of which one or two options they think are best.

12. Play the recording a final time. Learners listen and check their ideas.

13. In pairs, learners make a final selection of the correct answer for each question.

14. Check answers as a whole class. First, take a vote on each answer to see which option most learners have chosen. If there is any disagreement, ask them to explain and justify their choices and try to agree.

15. Refer to Listening Part 3 questions with answers and key information from the audioscript in the resources.

Answer key

<table>
<thead>
<tr>
<th>Speaker</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>D</td>
</tr>
<tr>
<td>2</td>
<td>B</td>
</tr>
<tr>
<td>3</td>
<td>C</td>
</tr>
<tr>
<td>4</td>
<td>B</td>
</tr>
<tr>
<td>5</td>
<td>A</td>
</tr>
<tr>
<td>6</td>
<td>D</td>
</tr>
</tbody>
</table>

Adaptation
For learners who need more support, let them choose from only two multiple-choice options instead of all four. (See the resources for this adaptation for the activity.)

Exam strategy
Remind your learners that in long texts, the questions come in the same order as the information in the recording, and therefore reflect the structure of the text. Help them to identify discourse markers, interviewers’ questions and other textual features that structure a text and are often reflected in the layout and wording of the task on the page.

Top tip
The multiple-choice questions in Part 3 use different words from the text. To prepare for this, learners should practise language for paraphrasing and reporting speakers’ attitudes and opinions. This includes things like reporting verbs (e.g. regrets, admits, resents, etc.), adjectives and adverbs describing attitudes and feelings (e.g. disappointed, frustrated, unexpected, etc.), words used to report opinions (e.g. insists, suggests, denies, etc.), and degrees of certainty (e.g. doubtful, convinced, etc.).

Optional follow-up
To help learners follow the flow of ideas in the recording, give them the audioscript and let them listen again. Encourage them to look for words that connect ideas (in the script for this activity these include though, also, but, etc.) and words that connect sentences (pronouns, relative clauses, that, these, etc.). Encourage learners to draw a line under each part of the script as the speakers move on to the focus of the next question in the task.
Part 4: Task familiarisation

Remember to check what learners know about the format of this part of the exam when you are preparing in class. Talk about exam strategies for Part 4. If they’re already familiar with this part of the exam, ask them what they find challenging. You can either check before you start Activity 4, or at a point in the lesson that you feel works best for your learners. Here are some helpful questions you can ask them.

- How many tasks are there? \( \text{(Two)} \)
- How many speakers will you hear in each task? \( \text{(Five)} \)
- How many extracts will you hear? \( \text{(Five)} \)
- How many multiple-choice options are there in each task? \( \text{(Eight)} \)
- So how many extra options are there, which do not match to any recording? \( \text{(Three per task)} \)
- What strategies can you use, or are you aware of, for the Part 4 task?

Activity 4: Listening Part 4

Aims: To reflect on the effectiveness of different strategies for this part of the exam; to practise listening for gist; to familiarise learners with the format of this part.

Also useful for: Gist listening in all other parts of the exam, Speaking Part 3 (see post-listening task).

Preparation and equipment: Open the resources with the example exam task. Make copies of the task for learners. Read the audioscript and be prepared for when the correct or incorrect answers appear in the recording.

Steps: Prepare to listen

1. Generate interest in the topic of the listening by getting learners to brainstorm 5–10 common leisure pursuits. If necessary, prompt them with hints to include the things mentioned by the five speakers in the recording (art, kayaking, gardening, music, puzzles).
2. In pairs, learners compare ideas and discuss what they like or dislike about each of the leisure pursuits in their lists.
3. For feedback, pairs now work in small groups to compare leisure pursuits. They should discuss and choose one activity from their combined lists that they’d all like to try. Hold a class vote to find the most popular one.

Exam strategy

Research has shown that different candidates approach this task in different ways, with equal success, so it’s best to avoid imposing one particular strategy on your learners. For example, classroom activities could focus on helping learners to identify the best method of approaching this task for themselves.

Strategy A

1. Highlight key words in the questions for both tasks.
2. Use the first listening to answer Task one.
3. Use the second listening to answer Task two.

Strategy B

1. Highlight key words in the questions for both tasks.
2. Use the first listening to answer Tasks one and two.
3. Use the second listening to check your answers.

Top tip

Remind learners that they must answer both tasks and that they will only hear the full series of recordings twice. There are two possible strategies they can adopt for Part 4.

Give learners the opportunity to try each approach while they are preparing for the exam. It might be an idea to try strategy A the first time they practise, and then try strategy B the second time. Encourage learners to reflect and discuss which strategy they found to be the most effective for them. This will help them when they go into the exam because they will know how best to complete the task based on what works best for them.

Activity 4: Listening Part 4

Listening 1

4. Give learners the complete Part 4 task supplied in the attachment. Tell them to look at the questions, highlight key words in both tasks and prepare to listen.
5. Tell learners they should choose either strategy A, or strategy B. Explain that they will have a chance later to reflect on how effective they found their chosen strategy, and if they’d like to try something different in future. See excerpt over page.
6. Play the recording. Learners follow the second step of the exam strategy they have chosen.
7. If possible, pair learners who took the same strategy approach. After the first listening ask them to compare their ideas.
Activity 4: Listening Part 4

Part 4 excerpt

**TASK ONE**
For questions 1–5, choose from the list (A–H) what each speaker likes most about their leisure pursuit.

| A | an ongoing sense of achievement |
| B | the level of concentration called for |
| C | the possibilities of social interaction |
| D | the excitement of a creative challenge |
| E | the mental stimulation |
| F | the chance to help others |
| G | escape from everyday concerns |
| H | the opportunity to gain qualifications |

**TASK TWO**
For questions 6–10, choose from the list (A–H) the drawback of their leisure pursuit each speaker mentions.

| A | conditions affecting motivation |
| B | a feeling of frustration |
| C | distraction from more productive activities |
| D | the amount of space needed |
| E | the frequent injuries |
| F | short-lived benefits |
| G | equipment requiring expenditure |
| H | the potential for disappointment |

While you listen you must:

**Top tip**
Remind learners that they should not choose an option just because they hear the same word or phrase in the recording. They should listen for the same idea.

**Adaptation**
For classes who need more support, remove the three extra options and let learners choose from only the five correct multiple-choice options instead of all eight. See the resources for the adapted version of the activity.

**Activity 4: Listening Part 4**

13. If possible, pair learners with a partner who tried a different strategy.

14. Ask learners to think about the strategy they used. They should approach this discussion like a Speaking Part 3 task: first comparing the advantages and disadvantages of the different approaches, and then deciding which approach they felt was more effective. (They do not have to agree on this—it’s alright if each learner finds a different approach more useful.)

15. Conduct feedback by inviting the whole class to listen and comment on each other’s opinions.

**Optional follow-up**
To give learners more practice of expressing attitudes and feelings, run a discussion activity as follows:

1. Put learners into small groups and give them a topical question to discuss within their group, such as:
   - Have you ever witnessed a very unusual or dramatic event? What was it? How was it reported in the media? How did you feel?
   - Do you prefer reading in digital or print formats? Why? What are the advantages and disadvantages of each one? Which do you think will be most popular in 20 years’ time?
   - Have you ever volunteered for a charity or local community group? Why do people do this kind of work? Does charitable work help or harm the people who do it and those who receive it? Why/how?

2. Create new groups with a representative from each group.

3. Brainstorm or supply useful language for learners to use when they report to their new group.

4. In their new groups, each learner has to report what the attitudes and feelings were from their original group.

As an extension, learners could write a newspaper article reporting on the class’s views related to the topic.
Extra resources

You might find the following resources helpful for the development of listening skills, both in class and as independent self-study.

Lesson plans and resources for teachers

• A variety of [free resources for preparing learners for Cambridge English Qualifications](#)

Webinar recordings about developing listening skills

• Teaching listening skills in the virtual age
• Preparing students online for Cambridge English Listening exam papers (A2 Key, B1 Preliminary and C1 Advanced exams)
• Assessing receptive skills (reading + listening) online
• Understanding listening assessment: what every teacher should know

Learn more about research into second language learning

Cambridge University Press has published over [20 free and easy-to-read research papers about second language learning and teaching](#). The following may be of particular interest:

• Giving feedback to language learners
• Specific Learning Difficulties in ELT
• Motivational aspects of using nearpeers as role models
• Personalization of language learning through mobile technologies
• Enhancing student interaction in the language classroom
• Phonics and literacy instruction for young learners in EFL
A few facts and figures about us:

• 7 million assessments taken every year
• Accepted by over 25,000 organisations worldwide
• 2,800 exam centres in over 130 countries
• Over 52,000 preparation centres
• Providing English language assessment since 1913

We help people learn English and prove their skills to the world
