

Listening

Why take an adaptive test?

- Your adaptive test is **personalised**. Some questions might be easy, and some will be more difficult. Your questions are chosen based on your previous answers.
- An adaptive test will give you an **accurate result** and a **better test experience** because it is tailored to your level.
- Your Listening test usually takes approximately 20–45 minutes, depending on your level. However, it could be shorter or longer than this.
- Your results will be available **immediately after** you complete the test.

What do I need to know about my test?

- Look at the [sample test](#) to become familiar with the tasks. The sample test is **not** adaptive. It shows you all the different types of tasks in the Cambridge EST Schools test. When you take your real test, you will see some of these tasks, but **not all** of them. The tasks you see will depend on your level.
- Before answering a question, read the task instructions and any context information about the listening audio. This will help your understanding.
- You can change your answer to any question on the same screen.
- Check all your answers carefully before you click on the arrow to move to the next screen. However, do not take too long to read through everything again, try to keep moving at a good, steady pace.
- When you click forward to the next screen, you will not be able to go back.
