What we know about music and the brain

Work on the human brain has (0) ……. how different parts are centres of activity for different skills, feelings, perceptions and so on. It has also been shown that the left and right halves, or hemispheres, of the brain are (1) ……. for different functions. While language is processed in the left, or analytical hemisphere, music is processed in the right, or emotional hemisphere. (2) ……. of music like tone, pitch and melody are all probably processed in different parts of the brain. Some features of musical experience are processed not just in the auditory parts of the brain, but in the visual ones. We don’t yet fully understand the (3) ……. of this.

The tempo of music seems to be (4) ……. related to its emotional impact, with fast music often (5) ……. as happier and slower music as sadder. It is the same with the major biological rhythm of the body: our heart (6) ……. quickens when we’re happy, but slows when we’re sad. Military music may have (7) ……. from attempts to get us ready for (8) ……. by using fast drumming to (9) ……. our hearts into beating faster. Music is perhaps one of the most complex experiences the brain (10) ……. with and it has become an absolutely (11) ……. part of our rituals and ceremonies. It has power beyond language to (12) ……. mood and co-ordinate our emotional states.

Mosquitoes

According to the World Health Organisation, malaria, a disease spread (0) by mosquitoes, affects millions of people every year. Everyone knows how irritating the noise made by a mosquito, (13) by a painful reaction to its bite, can be. It is astonishing that so (14) is known about why mosquitoes are drawn to or driven away from people, given (15) level of distress and disease caused by these insects. We know that the most effective chemical (16) protecting people against mosquitoes is diethyltoluamide, commonly shortened (17) deet. (18) deet works well, it has some serious drawbacks: it can damage clothes and some people are allergic to it.

Scientists know that mosquitoes find some people more attractive than others, but they do not know (19) this should be. They also know that people vary in (20) reactions to mosquito bites. One person has a painful swelling while (21) who is bitten by the same mosquito (22) hardly notice. Scientists have (23) discovered the reason for this, but they have carried (24) experiments to show that mosquitoes are attracted to, or put (25) by, certain smells. In the future, scientists hope to develop a smell that mosquitoes cannot resist. This could be used in a trap (26) that, instead of attacking people, mosquitoes would fly into the trap and be destroyed. For the time (27) however, we have to continue spraying ourselves with unpleasant liquids if we want to avoid getting bitten.
An ancient tree

In Totteridge, in north London, there is a yew tree estimated to be between 1,000 and 2,000 years old. This tree, however, is a mere youngster in

(0) ........ with others of the species. The record in the UK is held by a yew in

Scotland that is thought to be between 4,000 and 5,000 years old. However, such trees are becoming (28) ........ rare and the Totteridge specimen was considered of (29) ........ importance to be named in 1999 as one of the 41 ‘great trees’ in London. Like many yews, the Totteridge tree (30) ........ predates the buildings around it and its exact age is unknown.

The Totteridge tree needs little (31) ........ . Some of its outer branches hang down so low that they have taken root. But this is part of the tree’s natural architecture and contributes to its (32) ........ in high winds. With the best of

(33) ........ . ancient yew sites are often tidied up with no benefit to the tree.

Dead branches are not (34) ........ shed by the tree and their wood harbours a multitude of insects, an inseparable part of the old tree’s natural (35) ........ . Something of the tree’s history is lost with the (36) ........ of dead wood. After all, the decaying, twisted and (37) ........ parts give the tree character.
Part 4

For questions 38 – 42, think of one word only which can be used appropriately in all three sentences. Here is an example (0).

Part 5

For questions 43 – 50, complete the second sentence so that it has a similar meaning to the first sentence, using the word given. Do not change the word given. You must use between three and six words, including the word given. Here is an example (0).

Example:

0 James would only speak to the head of department alone.

ON

James ........................................... to the head of department alone.

The gap can be filled with the words ‘insisted on speaking’, so you write:

Example: 0 INSISTED ON SPEAKING

Write only the missing words IN CAPITAL LETTERS on the separate answer sheet.
