WHY DO WE LOVE COMING TO WORK EVERY DAY?

With over 10,000 superstars across 48 different countries globally, it is hard not to be inspired every single day. At Finastra we **celebrate** in global knowledge sharing, **diversity** and an opportunity to make a difference for each other and for our **customers** .

We are on a journey. After bringing two global Fintech leaders together in June 2017, Finastra has truly recognized the opportunity and **power** we have, by combining our expertise, successes and passion together. Whether it is in a **collaboration** hub or **innovating** with colleagues across our global landscape, we are one team creating a network of talent and creativity in a **stimulating** environment, to do what we can to make a difference for our **customers** .

Our **people** are leaders in their role and are always looking for new ways to help our **customers** grow, compete and optimize their business. From a graduate Software Engineer to an experienced Sales Executive – we are looking for personal leadership and people with the appetite to understand the markets and **customers** we serve. We drive **innovation** that **challenges the status quo** and feel proud of the positive differences that we make every day. We recognize talent and provide a work environment where leaders can **drive results** , develop and grow their careers.

Success is what you do, **success** is what we achieve, together.

The future of Finance is **open** – combine your talents with Finastra opportunities to create an exciting career with us.

The Responsibilities

Fast and easy deployments of our Fusion Invest solution are key aspects of client satisfaction. Having an implementation accelerator tool that is simple, comprehensive and relevant is therefore paramount. This internship offers you the opportunity to contribute to our future successes by enriching our implementation accelerator tool.

- Study our customer base in order to identify common practices that should be pre-packaged and easy to deploy when implementing new clients.
- Make the functional specifications for our accelerator tool in order to enrich it with your findings.
- Follow-up on the developments and assist the Q&A with the testing process.
- Develop the necessary tool allowing to assess the quality of the deliverables over time.

The Required Skills, Knowledge & Experience

- Passionate about Financial Engineering, Asset Management, Risk Management
- Interested in complex pricing models, risk management techniques, and market data management
- Interested in learning how to translate business requirements to functional specifications
- Excellent analytical skills
- Problem solving, proactive attitude
- Good team player
- Strong English communication skills, both written and verbal (English certificates Cambridge, TOEFL, IELTS are a plus)

The above statements describe the general nature and level of work being performed by people assigned to this job. They are not intended to be an exhaustive list of all responsibilities, duties, and skills required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. If you need assistance or an accommodation due to disability please contact us at 800-274-7280.

The Future is Collaborative . The Future is Open. The Future is Now.
